

BUREAU OF CENSUS AND STATISTICS, BRISBANE

BULLETIN NO. 13 OF 1971

To be treated as strictly **CONFIDENTIAL** and **NOT** to be published, broadcast, or cabled  
before 6 p.m. on Wednesday, 10 February 1971

INDUSTRIAL ACCIDENT STATISTICS, QUEENSLAND, MARCH QUARTER 1970

Details of industrial accidents are extracted from claims for workers' compensation finalised or becoming three years old during the quarter. They do not refer to accidents actually occurring within the period. This should be clearly borne in mind if comparisons with earlier periods are attempted. For further explanatory notes and definitions, see page 2.

During the March quarter 1970, 9,444 claims for work injuries were finalised. These claims covered 174,762 days of lost time through temporary disability, in addition to 13 fatalities and 222 cases of permanent disability.

Males were involved in 8,660 cases of work injuries which resulted in 13 fatalities, 207 cases of permanent disability, and 8,440 cases of temporary disability. These latter cases caused 157,752 days of lost time, or an average of 18.7 days per case of temporary disability.

Work injuries to females (784) resulted in 15 cases of permanent disability and 769 cases of temporary disability. The temporary disability cases resulted in a loss of 17,010 days, or an average of 22.1 days per case.

Of the 157,752 days lost by males through temporary disability injuries, the greatest loss resulted from over-exertion or strenuous movement, with 38,782 days of lost time. This type of accident recorded an average loss of time of 23.1 days per injury. Stepping on, striking, or being struck by objects resulted in a loss of 38,724 days, with an average of 13.1 days of lost time per injury; and falls of persons in a loss of 38,112 days, or 24.2 days per injury. A high proportion of the total days lost by females was also attributable to these three types of accidents.

## Explanatory Notes

In Queensland, workers' compensation insurance is confined solely to the State Government Insurance Office. An employer, by a policy with that Office, issued under the "Workers' Compensation Acts 1916 to 1966", indemnifies himself against all sums for which, in respect of injury to any worker employed by him, he may become legally liable by way of compensation or damages in relation to that injury. Claims made on the State Government Insurance Office are therefore the sole source of information on compensative industrial accidents.

Self-employed persons are not obliged to insure, hence a number of accidents to workers in primary industry and in the professions etc. are not recorded. Also, members of the Police Force and the Commonwealth Public Service, including the P.M.G.'s Department, are excluded by the provisions of the Act, and coverage is thereby restricted in the administrative and communications industries.

By definition, the scope of the collection is limited to include only those injured employees who lost at least a full shift from work as a result of the accident. Cases of occupational diseases precipitated or aggravated by some accidental event are classified to the antecedent work injury rather than to the disease. This bulletin excludes particulars of accidents occurring during recess periods or on the journey to or from work, and of occupational diseases, all of which are published annually.

## Definitions

An Industrial Accident is defined as any compensated work injury or a compensated occupational disease causing death or permanent disability, or the temporary disability of the injured person during the entire interval corresponding to the hours of his or her regular shift on any one or more calendar days subsequent to the date of the injury. Details of Work Injuries only are given in the following tables.

Fatal injuries are so classified regardless of the time intervening between injury and death, providing that death occurs within three years of the intimation of the claim.

Permanent Disability is an injury which does not cause death but results in the complete loss or loss of use of any member or part of a member of the body, or in any permanent impairment of the functions of the body or part thereof.

Temporary Disability is any injury which does not result in death or permanent impairment, but renders the injured person unable to perform a regularly established job during the entire time interval corresponding to the hours of a full, regular shift.

Duration of Temporary Disability refers to the number of calendar days lost rather than to the actual number of working days lost.

Type of Accident is the event which directly resulted in the injury (i.e. the manner in which contact was made between the injured person and the object or substance causing the injury).

Agency Related to the Accident is the agency (i.e. working environment, production equipment, animal, etc.) which, because of its hazardous nature or condition, precipitated the event designated as the accident.

Table 1 - Work Injuries: Industry Group by Extent of Disability and Duration of Temporary Disability,
